

# 3 Flow Series

## COMPLETELY AUTOMATIC FILTER CLEANING SYSTEM

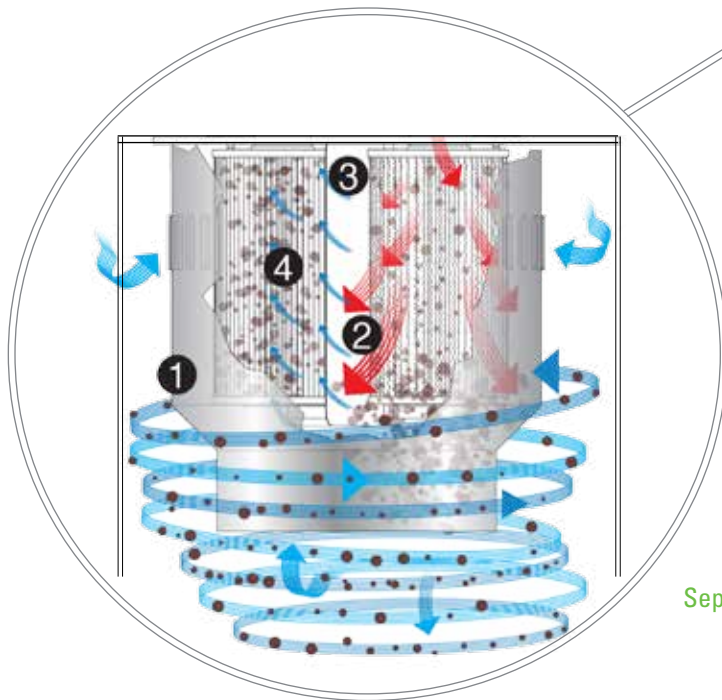

Maintain full suction power and top performance without having to stop.

## FILTERS THAT GUARANTEE A DUST FREE ENVIRONMENT

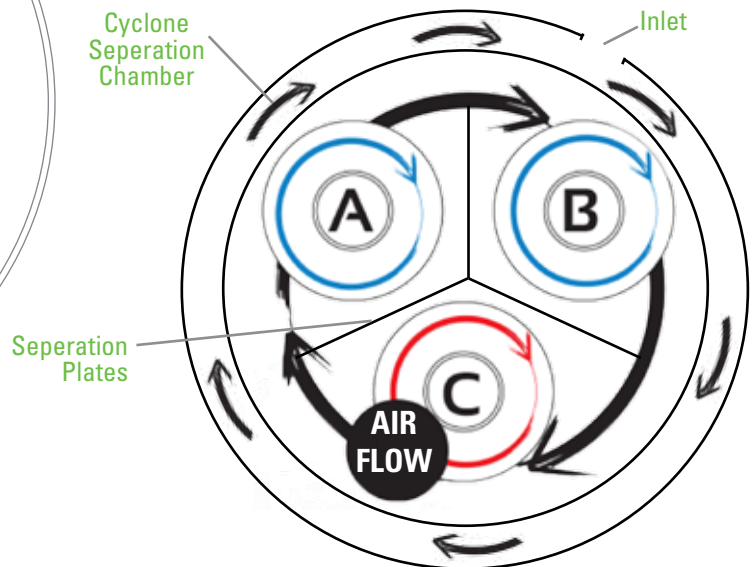

The filters are separated by plates to prevent the falling dust of the filter being cleaned from depositing on the other filters during use.

## FILTERS ARE ALWAYS CLEAN

The Cyclic Filter Cleaning takes place every minute alternating making sure the filters always clean producing an effective vacuum.

During the cleaning process for example A and B will have suction while C is reversing the airflow forcing it through the filter.

## THE INNOVATION OF THE FILTER SYSTEM

**1.** The 3 filters are protected by a special cyclone effect preventing rapid filter clogging

**2.** The filters are separated by plates that prevent the falling dust of the filter being cleaned from depositing on the other filters

**3.** Provides the perfect filter cleaning by air being forced through the filter

**4.** Suction continues even during the cyclic filter cleaning phases

# There are three models available in the 3 Flow Series

## 3 Flow Poly

- Made of a polyethylene tank that is dent and scratch resistant
- Compact and rugged design makes sure this vacuum will last up to the demands of a construction site
- Easy to transport

## 3 Flow Barrel Vac

- The Barrel Vac adapter fits on top of a standard 55 gallon drum
- Great for bigger jobs where large amounts of dust/debris needs to be contained

## DustPro 3 Flow

- Empty and remove your collection of dust/debris with ease! The hinged tipping design makes removing the bag easier, no heavy lifting required.
- Allows you to utilize standard contractor grade trash bags

Technical data		3 Flow	Barrel Vac	DustPro III SC
Air Flow	CFM	281 CFM	281 CFM	281 CFM
Water Lift	Inches	100"	100"	100"
Capacity	Gallon	24 Gal	55 Gal Drum	19 Gal
Motor	Voltage	3 x 1000 W 110V 60Hz	3 x 1000 W 110V 60Hz	3 x 1000 W 110V 60Hz
